Biopolymers

Contents

Vol. 23, Issue Nos. 1–12, 1984

ISSUE NO. 1, JANUARY

RESEARCH COMMUNICATIONS

Cooperative Changes in the Chiroptical Properties of DNA Induced by Methanol
M. Vorlíčková, E. E. Minyat, and J. Kypr 1

ARTICLES

Secondary Structure of Polypeptide Hormones of the Anterior Lobe of the Pituitary Gland
A. A. Makarov, N. G. Esipova, V. M. Lobachov, B. A. Grishkovsky, and Yu. A. Pankov 5

Computer Building of β-Helical Polypeptide Models
R. E. Koeppe II and M. Kimura 23

Slow Relaxational Processes in the Melting of Linear Biopolymers: A Theory and Its Application to Nucleic Acids
V. V. Anshelevich, A. V. Vologodskii, A. V. Lukashin, and M. D. Frank-Kamenetskii 39

Polyelectrolyte Complexes of Glycol Chitosan with Some Mucopolysaccharides: Dielectric Properties and Electrical Conductivity
S. Pushpa and R. Srinivasan 59

Conformational Change in Yeast $tRNA^{Asp}$
P. V. Huong, E. Audry, R. Giege, D. Moras, J. C. Thierry, and M. B. Comarmond 71

Ethidium Binding to Deoxyribonucleic Acid: Spectrophotometric Analysis of Analogs with Amino, Azido, and Hydrogen Substituents
L. W. Yielding, K. L. Yielding, and J. E. Donoghue 83

Structure of a Cellulose I–Ethylenediamine Complex
D. M. Lee, K. E. Burnfield, and J. Blackwell 111

Kinetics of Formation of Fibrin Oligomers. III. Ligation Kinetics Concurrent with and Subsequent to Oligomer Assembly
M. D. Bale, P. A. Janmey, J. D. Ferry, and L. Lorand 127

Interactions of Molecules with Nucleic Acids. VII. Intercalation and T·A Specificity of Daunomycin in DNA
D. D. Newlin, K. J. Miller, and D. F. Pilch 139

Small-Angle X-Ray Scattering Studies on Yeast Inorganic Pyrophosphatase and its Interactions with Divalent Metal Ions, Inorganic Phosphate, and Hydoxymethane Bisphosphonate
P. Thiyagarajan, C. S. Borso, A. Banerjee, and B. S. Cooperman 159

Transport Properties of Rigid and Flexible Macromolecules by Brownian Dynamics Simulation
S. A. Allison and J. A. McCammon 167

Information for Contributors 189

ISSUE NO. 2, FEBRUARY

RESEARCH COMMUNICATIONS

Comment on Breathing and Bending in DNA
J. M. Schurr 191

The Effect of Deuterium Substitution on Hydrogen Bonds in Redox Proteins
R. P. Sheridan, E. T. Knight, and L. C. Allen 195

ARTICLES

Mean-Square Hydrophobic Moment for Partially Helical Polypeptides
M. M. Hamed and W. L. Mattice 201

Intercalation of Ethidium Ion into DNA and RNA Oligonucleotides
J. W. Nelson and I. Tinoco, Jr. 213

Characterization of DNA Structures by Laser Raman Spectroscopy
B. Prescott, W. Steinmetz, and G. J. Thomas, Jr. 235

Structure of Hydrated Na^+ Ions Around a Region of A- or B-DNA Helix
W. K. Lee, Y. Gao, and E. W. Prohofsky 257

Monte Carlo Determination of the Distribution of Ions About a Cylindrical Polyelectrolyte
M. Le Bret and B. H. Zimm 271

Distribution of Counterions Around a Cylindrical Polyelectrolyte and Manning's Condensation Theory
M. Le Bret and B. H. Zimm 287

The C-Terminal Extrahelical Peptide of Type I Collagen and Its Role in Fibrillogenesis *in vitro:* Effects of Ethylurea
M. J. Capaldi and J. A. Chapman 313

Formation of $\psi(+)$ and $\psi(-)$ DNA
Y. A. Shin and G. L. Eichhorn 325

Variation of Longitudinal Acoustic Velocity at Gigahertz Frequencies with Water Content in Rat-Tail Tendon Fibers
S. Cusack and S. Lees 337

Studies of Collagen Fold Formation in Aqueous Solutions of α-Gelatin III
I. Thorn and D. Eagland 353

Multistep Brownian Dynamics: Application to Short Wormlike Chains
S. A. Allison and J. A. McCammon 363

Contributions of the PO Ester and CO Torsion Angles of the Phosphate Group to ^{31}P-Nuclear Magnetic Shielding Constant in Nucleic Acids: Theoretical and Experimental Study of Model Compounds
C. Giessner-Prettre, B. Pullman, F. Ribas Prado, D. M. Cheng, V. Iuorno, and P. O. P. Ts'o 377

Information for Contributors 389

ISSUE NO. 3, MARCH

RESEARCH COMMUNICATIONS

Insulin's Structure as a Modified and Monomeric Molecule
R. C. Bi, Z. Dauter, E. Dodson, G. Dodson, F. Giordano, and C. Reynolds 391

ARTICLES

CNDO/2 Quantum-Mechanical Calculations of the Conformational Flexibility of the Diketopiperazine Skeleton
J. Ciarkowki 397

Unwinding Kinetics of Cooperatively Melting Regions in DNA
A. Suyama and A. Wada 409

Matrix-Method Calculation of Linear and Circular Dichroism Spectra of Nucleic Acids and Polynucleotides
V. Rizzo and J. A. Schellman 435

Low-Frequency Raman Scattering by Anharmonic DNA Modes with A⇌B Character Modeled with a Classical Double-Well Oscillator
A. J. Martin 471

Interaction of Poly-5-bromouridylic Acid. I. Formation of Helical Complexes with Various Adenine and 2-Aminoadenine Derivatives
S. Higuchi 493

Conformational Study of Trinucleoside Tetraphosphate d(pCpGpCp): Transition of Right-Handed Form to Left-Handed Form
C. N. Yoon, Y. K. Kang, and M. S. Jhon 511

Relaxation Kinetics of DNA–Ligand Binding Including Direct Transfer
D. P. Ryan and D. M. Crothers 537

Ion Transport through Liquid Membrane by Cyclic Octapeptides
S. Kimura and Y. Imanishi 563

^{31}P-NMR Studies of Deoxyoligonucleotides
D. M. Cheng, L-S. Kan, V. L. Iuorno, and P. O. P. Ts'o 575

Microwave Dielectric Absorption of DNA in Aqueous Solution
K. R. Foster, M. A. Stuchly, A. Kraszewski, and S. S. Stuchly 593

A Monte Carlo Estimate of DNA Loop Formation
C. B. Post 601

ERRATUM

Total Intensity Light Scattering from Short, Optically Anisotropic Wormlike Chains
S. A. Allison 607

Information for Contributors 609

ISSUE NO. 4, APRIL

RESEARCH COMMUNICATIONS

Dimensions of Short, Rodlike Macromolecules from Translational and Rotational Diffusion Coefficients. Study of the Gramicidin Dimer
J. García de la Torre, M. C. Lopez Martinez, and M. M. Tirado 611

Folded β-Turns and Collagenlike Conformations of -Gly-Pro- and -Pro-Gly- Sequences in Synthetic Polytripeptides
A. M. Tamburro and V. Guantieri 617

L-Alanyl-Glycylglycine: FT-IR and Raman Spectroscopic Evidence for Tripeptide Packing in a Collagenlike Arrangement
V. Renugopalakrishnan, P. H. B. Kloumann, and R. S. Bhatnagar 623

ARTICLES

Intercalation of Cationic Dyes in the DNA Double Helix: Introductory Theory
C. Bustamante and D. Stigter 629

Viscometry and Sedimentation Equilibrium of Partially Hydrolyzed Hyaluronate: Comparison with Theoretical Models of Wormlike Chains
R. L. Cleland 647

Conformational Studies of Adenosine 5′-Phosphorodiamidates in Aqueous Solution
J. Tomasz, K. Barabás, S. Bottka, J. Kajtár, M. Kajtár, M. Kajtár-Peredy, and L. Radics 667

Alternative Pathways in Diffusion–Collision Controlled Protein Folding
D. L. Weaver 675

Proton Polarizability of Poly(L-tyrosine)–Hydrogen Phosphate Hydrogen Bonds as a Function of Alkali Cations
G. Zundel and K. Leberle 695

Electric Birefringence Study of the Purple Membrane of *Halobacterium halobium*
L. D. Kahn and S-I. Tu 707

Aggregation of Poly(γ-benzyl-α,L-glutamate)
S. Chakrabarti and W. G. Miller 719

Mechanism of Gel Formation of μ-Carrageenan
C. Rochas and M. Rinaudo 735

Self-Association of the Neuroregulatory Peptide Substance P and Its C-Terminal Sequences
M. Rueger, M. Bienert, B. Mehlis, K. Gast, D. Zirwer, and J. Behlke 747

Cation-Induced Conformational Changes in tRNA Molecules
F. Mazzei and G. Onori 759

The Titratable Joint Phenomenon in ΦW-14 DNA
J. Wilcoxon, J. M. Schurr, and R. A. J. Warren 767

^{1}H- and ^{31}P-Nuclear Magnetic Resonance Studies on the Conformation of d-$(CpGpCpG)_2$ and d-$(CpGpCpGpCpG)_2$ Short Helices in B-Conformation
D. M. Cheng, L-S. Kan, D. Frechet, P. O. P. Ts'o, S. Uesugi, T. Shida, and M. Ikehara 775

Quasielastic Light-Scattering Studies on Dinucleosomal-Sized DNA: Ionic-Strength Dependence
K. S. Schmitz and M. Lu 797

Electrostatic Interactions Between α-Helix Dipoles in Crystals of an Uncharged Helical Undecapeptide
W. G. J. Hol and M. C. H. De Maeyer 809

^{13}C-NMR Chemical Shifts and the Conformations of Rigid Polypeptides
A. Tonelli 819

Interaction of Poly-5-bromouridylic acid. II. Thermodynamic Analysis of its Interaction with Adenosine and 9-Methyladenine
S. Higuchi and K. Yasui 831

ERRATUM

Modeling Biological Macromolecules in Solution. II. The General Tri-axial Ellipsoid
S. E. Harding and A. J. Rowe 843

Information for Contributors 845

ISSUE NO. 5, MAY

RESEARCH COMMUNICATIONS

Eu(III) Ion Binding to Poly(L-Glutamate) Anion Studied by Environment-Sensitive Laser Spectroscopy
M. Starzak and M. Cohen 847

DNA–Topoisomer Analysis on the Basis of the Helical Wormlike Chain
J. Shimada and H. Yamakawa 853

ARTICLES

Most-Probable Distribution at Enzyme Depolymerization of Polysaccharides
A. K. Mazur 859

Circular Dichroism Studies of α-Aminoisobutyric Acid-Containing Peptides: Chain Length and Solvent Effects in Alternating Aib-L-Ala and Aib-L-Val Sequences
E. K. S. Vijayakumar, T. S. Sudha, and P. Balaram 877

Solvent Isotope Effect on the Differences in Structure and Stability between Normal and Deuterated Proteins
C.-H. Chen, F. Tow, and D. S. Berns 887

Physical Binding of Pyrene and Phenanthrene to Native and Denatured DNA: Measurements by Spectral and Coupled-Column Liquid Chromatography Methods
H. P. Nelson, Jr. and H. DeVoe 897

Effects of Viscous Solvent on DNA Polymer in a Fiber
B. H. Dorfman and L. L. Van Zandt 913

Vibrational Analysis of Peptides, Polypeptides, and Proteins. XVIII. Conformational Sensitivity of the α-Helix Spectrum: α_I- and α_{II}-Poly(L-alanine)
A. M. Dwivedi and S. Krimm 923

Interaction of Poly(I)·Poly(C) with *trans*-Dichloro-Diammine-Platinum (II)
D. Hermann, G. V. Fazakerley, C. Houssier, and W. Guschlbauer 945

Proton-NMR Study of the Interaction of *trans*-Dichloro-Diamine-Platinum(II) with Poly(I) and Poly(I)·Poly(C)
G. V. Fazakerley, D. Hermann, W. Guschlbauer, and G. Hawkes 961

Interaction of Poly(I) and Poly(I)·Poly(C) with Chlorodiethylenetriamino Platinum(II) Chloride
D. Hermann, G. V. Fazakerley, and W. Guschlbauer 973

ERRATUM

Macromolecularization of a Tripeptide Analog of the Cu(II) Binding Site of Human Serum Albumin. I. Synthesis, Conformation, and Binding Properties of a Gly-Gly-His Derivative of Poly(L-Lysine)
L. Michielin, S. Mammi, and E. Peggion 985

Information for Contributors 987

ISSUE NO. 6, JUNE

RESEARCH COMMUNICATIONS

Steric Effects in the Coagulation of Casein Micelles by Ethanol
D. S. Horne 989

ARTICLES

Conformation Study on Heparin by Intermediate-Angle X-Ray Scattering
S. Yamaguchi, H. Hayashi, F. Hamada, and A. Nakajima 995

Molecular Conformations and 8-CH Exchange Rates of Ribo- and Deoxyribonucleotides: Investigation by Raman Spectroscopy
J. M. Benevides, D. Lemeur, and G. J. Thomas, Jr. 1011

X-Ray Crystallographic Analysis of a Ternary Intercalation Complex between Proflavine and the Dinucleoside Monophosphates CpA and UpG
A. Aggarwal, S. A. Islam, R. Kuroda, and S. Neidle 1025

Study of Polysaccharides by the Fluorescence Method. III. Chain Length Dependence of the Micro-Brownian Motion of Amylose in an Aqueous Solution
S. Kitamura, H. Tanahashi, and T. Kuge 1043

Mean-Square Helical Hydrophobic Moments in Partially Ordered Proteins
M. M. Hamed and W. L. Mattice 1057

Monoazido Analog of Ethidium as a Chromatin Probe: Binding to DNA
G. L. Coffman, L. W. Yielding, and K. L. Yielding 1067

Synthesis and Properties of L-Cysteinyl-L-Cysteine Disulfides
S. Capasso, L. Mazzarella, T. Tancredi, and A. Zagari 1085

Quasi-Harmonic Method For Studying Very Low Frequency Modes In Proteins
R. M. Levy, A. R. Srinivasan, W. K. Olson, and J. A. McCammon 1099

Dynamic Light Scattering as a Probe of Superhelical DNA–Intercalating Agent Interaction
J. Newman 1113

Quantitative Aspects of the Development of a Hydrophobic Binding Site on Calmodulin by Calcium Binding
R. F. Steiner 1121

ERRATA

Temperature Dependence of the Dynamic Light Scattering of Linear ϕ29 DNA: Implications for Spontaneous Opening of the Double-Helix
Fluctuational Base-Pair Opening in DNA at Temperatures Below the Helix–Coil Transition Region
J. Wilcoxon, J. M. Schurr, R. M. Wartell, and A. S. Benight 1137

Contributions of Synthetic Polymers of Amino Acids to Knowledge of Immune Response
P. H. Maurer, U. M. Babu, C.-H. Lai, J. Anderson, and C. F. Merryman 1141

Interaction of Poly(I)-Poly(C) with *trans*-Dichloro-Diammine-Platinum (II)
D. Hermann, G. V. Fazakerley, C. Houssier, and W. Guschlbauer 1143

Information for Contributors 1145

ISSUE NO. 7, JULY

Analysis of the High- and Low-Spin Soret Bands of Horse-Heart Metmyoglobin Complexes
A. C. I. Anusiem and M. Kelleher 1147

Locally Oscillatory Motion of RNA Helix Derived from Linear Relationships of Backbone Torsion Angles
K. Kitamura, H. Mizuno, T. Amisaki, K-I. Tomita, and Y. Baba 1169

The Speed of Sound in DNA
M. B. Hakim, S. M. Lindsay, and J. Powell 1185

β-Bend Conformation of CH_3CO-Pro-Pro-Gly-Pro-$NHCH_3$: Implications for Posttranslational Proline Hydroxylation in Collagen
E. Lee, G. Némethy, H. A. Scheraga, and V. S. Ananthanarayanan 1193

Conversion from a Virtual-Bond Chain to a Complete Polypeptide Backbone Chain
E. O. Purisima and H. A. Scheraga 1207

Interaction of Metal Ions with Gastrointestinal Hormones: Binding Studies of Mg^{++} to Biologically Active Analogs of Little Gastrin and Minigastrin
E. Peggion, S. Mammi, M. Palumbo, L. Moroder, and E. Wünsch 1225

Circular Dichroic Studies on Cu(II) Interactions with a Protamine, Scylliorhinine Z_3
H. Kozlowski, J. P. Aubert, M. Gusse, P. Chevaillier, and M. H. Loucheux-Lefebvre 1241

Kinetics of Irreversible Dissociation for Proteins Bound Cooperatively to DNA
A. C. Balazs and I. R. Epstein 1249

Liquid Crystallinity in Collagen Solutions and Magnetic Orientation of Collagen Fibrils
N. S. Murthy 1261

Conformation of P-Form DNA
M. H. Zehfus and W. C. Johnson, Jr. 1269

Rigidity of Myosin and Myosin Rod by Electric Birefringence
S. Hvidt, T. Chang, and H. Yu 1283

Ionic and Structural Effects on the Thermal Helix–Coil Transition of DNA Complexed with Natural and Synthetic Polyamines
T. J. Thomas and V. A. Bloomfield 1295

The Effects of Alkali-Metal Chlorides and of Spermidine and Spermine on the Swelling Pressures of DNA Gels in the Ultracentrifuge
A. J. Richard 1307

Circular Dichroism of Core DNA in Mononucleosomes: A Theoretic Model
I. Tobias 1315

How Alike are the Shapes of Two Random Chains?
A. D. McLachlan 1325

Effect of Cationic Surfactants on the Conformation and Aggregation of Poly(L-glutamic acid)
H. Maeda, H. Kato, and S. Ikeda 1333

pH-Jump Titration of the Tyrosyl Groups of Bovine Plasma Albumin
K. Kuwajima, T. Matsushima, K. Nitta, and S. Sugai 1347

Induced Optical Activity in the Complex of Poly(L-arginine) with Azo Dyes
H. Yamamoto and A. Nakazawa 1367

Antifreeze Glycoproteins: Influence of Polymer Length and Ice Crystal Habit on Activity
T. S. Burcham, M. J. Knauf, D. T. Osuga, R. E. Feeney, and Y. Yeh 1379

Synthesis of Oligopeptides Consisting of L-Leucyl-L-Leucyl-L-Alanyl and L-Methionyl-L-Methionyl-L-Leucyl Repeating Units with an Improved Preparation of Nps-Amino Acids
R. Katakai, H. Shida, and T. Takada 1397

Conformation of Oligopeptides with L-Leucyl-L-Leucyl-L-Alanyl and L-Methionyl-L-Methionyl-L-Leucyl Repeating Units
R. Katakai and Y. Iizuka 1411

Azobenzene-Containing Polypeptides: Photoregulation of Conformation in Solution
F. Ciardelli, O. Pieroni, A. Fissi, and J. L. Houben 1423

Information for Contributors 1439

ISSUE NO. 8, AUGUST

Conformation of a Cyclic Tetrapeptide Related to an Analog of Enkephalin
D. Hall and N. Pavitt 1441

Dielectric Properties of Aqueous Solutions of Sonicated DNA above 40 MHz
J. R. de Xammar Oro and J. R. Grigera 1457

Polypeptide Matrices as Active Catalytic Supports for Stereoselective Electron-Transfer Reactions
B. Pispisa and M. Farinella 1465

Structural Dynamics of Melanin Investigated by Rayleigh Scattering of Mössbauer Radiation
G. Albanese, M. G. Bridelli, and A. Deriu 1481

Conformational Analysis of Polytripeptides $(Gly\text{-}Pro\text{-}Ala)_n$, $(Gly\text{-}Ala\text{-}Hyp)_n$, and $(Gly\text{-}Ala\text{-}Ala)_n$ in Connection with the Problem of Collagen Structure
V. G. Tumanyan, R. A. Abagyan, and N. G. Esipova 1499

A Consistent Empirical Potential for Water–Protein Interactions
J. Hermans, H. J. C. Berendsen, W. F. Van Gunsteren, and J. P. M. Postma . 1513

Vibrational Circular Dichroism of Polypeptides. II. Solution Amide II and Deuteration Results
A. C. Sen and T. A. Keiderling 1519

Vibrational Circular Dichroism of Polypeptides. III. Film Studies of Several α-Helical and β-Sheet Polypeptides
A. C. Sen and T. A. Keiderling 1533

Topological Aspects of Conformational Transformations in Proteins
S. Chiavarini, P. de Santis, S. Morosetti, and A. Palleschi 1547

Vibrational Analysis of Peptides, Polypeptides, and Proteins. XXI. β-Calcium-Poly(L-Glutamate)
P. K. Sengupta, S. Krimm, and S. L. Hsu 1565

Helix Formation by Hydroxyamyl-L-Glutaminyl Residues in Water and Aqueous Sodium Dodecyl Sulfate
T. Overgaard, D. Erie, J. A. Darsey, and W. L. Mattice 1595

Buried Surface Area, Conformational Entropy, and Protein Stability
A. A. Rashin 1605

Information for Contributors 1621

ISSUE NO. 9, SEPTEMBER

Characterization of the Transition State of Lysozyme Unfolding. II. Effects of the Intrachain Crosslinking and the Inhibitor Binding on the Transition State
S.-I. Segawa and M. Sugihara 2489

Molecular Mechanical Studies of Base-Pair Opening in d(CGCGC):d(GCGCG), dG_5-dC_5, d(TATAT):d(ATATA), and dA_5-dT_5 in the B and Z Forms of DNA
J. Keepers, P. A. Kollman, and T. L. James 2499

Conformational Flexibilities in Malformin A
A. K. Mitra and R. Chandrasekaran 2513

Helical Conformation of Amylose in Aqueous Solution. I. Viscosity Measurements
H. Elmgren 2525

Helical Conformation of Amylose in Aqueous Solution. II. Electron Spin Resonance, Fluorescence Depolarization, and Sedimentation Measurements
B. Ebert and H. Elmgren 2543

Characterization of the Fluorescence of the Protamine Thynnine and Studies of Binding to Double-Stranded DNA
J. Ausio, K. O. Gruelich, E. Haas, and E. Wachtel 2559

Infrared Spectra and Conformation of Monodisperse Oligo-γ-Benzyl-L-Glutamates in Solution
T. Imae and S. Ikeda 2573

Tritium Exchange of Spectrin Versus Temperature
D. Bonnet, M. C. Marden, E. Begard, G. Hui Bon Hoa, and P. Douzou 2587

The DNA Phosphate Orientation. Infrared Data and Energetically Favorable Structures
W. Pohle, V. B. Zhurkin, and H. Fritzsche 2603

Low-Temperature Conformation of Mg^{2+}-Poly(U) in D_2O as Revealed by IR and Raman Spectroscopy and by Normal-Mode Analysis Treatment
J. Bandekar and G. Zundel 2623

On the First-Neighbor Analysis of Nucleic Acid CD Spectra: The Definitive *T* Matrix and Considerations of Various Methods
F. S. Allen, D. M. Gray, and R. L. Ratliff 2639

The Resolution of Nucleic Acid–Ligand Binding Sites by CD First-Neighbor Analysis
F. S. Allen and D. M. Gray 2661

Information for Contributors 2669

ARTICLES

Polyelectrolyte Effects on Site-Binding Equilibria with Application to the Intercalation of Drugs into DNA
R. A. G. Friedman and G. S. Manning 2671

Magnetic Circular Dichroism of Adenine, Hypoxanthine, and Guanosine 5′-Diphosphate to 180 nm
J. C. Sutherland and K. Griffin 2715

Analysis of the Electrophoretic Properties of Double-Stranded DNA and RNA in Agarose Gels at a Finite Voltage Gradient
S. P. Edmondson and D. M. Gray 2725

Differential Electrostatic Stabilization of A-, B-, and Z-Forms of DNA
J. B. Matthew and F. M. Richards 2743

On the Precipitation of Proteins by Polymers: The Hemoglobin–Polyethylene Glycol System
R. N. Haire, W. A. Tisel, J. G. White, and A. Rosenberg 2761

Role of Proline · · · Proline Interactions in the Packing of Collagenlike Poly(tripeptide) Triple Helices
G. Némethy and H. A. Scheraga 2781

Generalized Poisson-Boltzmann Calculation of the Distribution of Electrolyte Ions Around the B- and Z-Conformers of DNA
G. R. Pack and B. J. Klein 2801

The Conformational Transition of κ-Carrageenan Using Microcalorimetry
C. Rochas and J. Mazet 2825

Precollapse of T7 DNA by Spermidine at Low Ionic Strength: A Linear Dichroism and Intrinsic Viscosity Study
W. A. Baase, P. W. Staskus, and S. A. Allison 2835

Interactions of Molecules with Nucleic Acids. XI. Generalization of Techniques to Generate Nucleic Acid Structures with Applications to Intercalation Sites and Kinked Structures
E. R. Taylor and K. J. Miller 2853

Suppression of the Statistical Coil State during the $\alpha \leftrightarrow \beta$ Transition in Homopolypeptides
W. L. Mattice and H. A. Scheraga 2879

Low-Frequency Dynamics of Solid Poly(L-alanine) from Raman Spectroscopy
M. Tipping, K. Viras, and T. A. King 2891

Molecular-Mechanical Studies of the Mismatched Base Analogs of d(CGCGAATTCGCG)$_2$:d(CGTGAATTCGCG)$_2$, d(CGAGAATTCGCG)$_2$, d(CGCGAATTCACG)$_2$, d(CGCGAATTCTCG)$_2$, and d(CGCAGAATTCGCG)·d(CGCGAATTCGCG)
J. W. Keepers, P. Schmidt, T. L. James, and P. A. Kollman 2901

Molecular-Mechanical Studies of Hormone–Protein Interactions: The Interaction of T_4 and T_3 with Prealbumin
S. J. Oatley, J. M. Blaney, R. Langridge, and P. A. Kollman 2931
